Meta-Pac Work Boots - 16"

OVERVIEW

100% waterproof and designed to handle the toughest conditions in the mine, the Meta-Pac work boots provide the protection and features needed to get you through your day. A Vibram® outsole is extremely durable and offers superior traction. Steel toe, Steel midsole and floating metatarsal guard meet or exceed ASTM standard certification.

Features

- **Ozone-resistant, abrasion-resistant rubber** offers 100% waterproof protection.
- **Steel toe, steel midsole and metatarsal guard** all meet and exceed ASTM F 2413 M 1/75 C/75 Mt/75 EH PR.
- **Contoured heel** prevents heel slippage and gives you a more ridged fit.
- **Double layer toe guard** provides extra-long wear in conditions where crawling is required.
- **Long-wearing Vibram® Lug outsole** for heavy-duty traction in outdoor conditions
- **Removable insole** for cushioning comfort.
- 16" height.
- Weight: 6.7 lbs per pair.

SIZE & FIT

Ankle-Fit Technology

In 1963, our innovative Ankle-fit design changed rubber boot comfort forever. By narrowing the ankle area, Ankle-fit boots gripped the top of the foot better and locked the heel in place. This revolutionary design kept tall, heavy-duty, rubber boots from pulling loose in mud and also prevented rubbing and chafing. Today, all of our rubber products are designed with Ankle-fit technology for a more comfortable, better fitting boot.

Width

This boot is available in a Medium Width.

Tips for the Perfect Fit

- Measure both feet. If one foot is slightly larger than the other, select a size that fits the larger of the two.
- Consider the type of socks you'll be wearing with your boot. For thicker socks, you may want to select a half size larger than you normally wear.
- When you do receive your boots, we recommend first wearing them indoors for a few hours to ensure they're the right fit.
