

Northern Light® Eclipse:

The next generation in Cap Lamps

NL Technologies is pleased to introduce the Northern Light® Eclipse. This new lighting product incorporates the latest lighting technologies with the high-quality expected of the Northern Light® Brand, but at a lower cost.

The Northern Light® Eclipse is small and thin with an ergonomic design. A brand new charging system has been designed to support the Eclipse.

This new charging system was designed to optimize the life of Lilon batteries. Like the Eclipse, the new charging system will be smaller-taking up less real-estate in lamp rooms.

Benefits

- ❑ Lowest cost-of-ownership
- ❑ Reduced weight and size
- ❑ Unique charging system optimizes life of Lilon batteries

Features:

- ❑ Unique TIR™ Technology in Headpiece
- ❑ Supports WiFi or RFID tags for tracking
- ❑ 12V DC Vehicle adaptors available
- ❑ Chargers can be mounted on existing Northern Light® Charging Racks

Battery

Type:	Lithium Ion
Voltage:	3.6V
Life Span:	> 500 Charging Cycles
Charge Time:	<12 hours
Discharge Time:	>12 hours
Weight:	400 grams

Lighting

Primary Light Source:	1 Watt LED
Secondary Light Source:	LED
LUX:	2500-3000
Lifespan:	> 20,000 hours
